## EXPERIENCE

**UCSD DEAN'S OFFICE, SCHOOL OF MEDICINE** | PROGRAMMER ANALYST | *San Diego, CA* JULY '16 – APRIL '17

*Created web applications to aid business operations for the UCSD School of Medicine*

- Created secure, documented, normalized, indexed, and efficient database schemas
- Developed Perl and Bash scripts to efficiently automate manipulation of MySQL databases
- Developed Java web applications from stakeholder proposals within the UCSD School of Medicine

**BREWNGO** | WEB DEVELOPER/WEB DESIGNER | *Brewngo.com* | *San Diego, CA* JULY '16 – SEPT '16

*Startup company introducing the world's first automatic and portable coffee/tea brewer*

- Implemented third-party applications such as Squarespace to prototype and template design ideas
- Researched competitive marketplace and their websites to learn how to tailor to audience experience
- Explored different forms of user testing such as implementing Crazy Eggs to generate visitor heatmap

**KARMONIZE** | WEB DEVELOPER | *karmonize.org* | *San Diego, CA* MAY '16 – JULY '16

*A modern social bartering system in which currency is spent and received via everyday services*

- Independently picked up weekly tasks to complete via team discussion board during development
- Attained valuable, first-hand experience concerning version control and responsive design
- Created front-end views to show informative data in intuitive and visual ways

## PROJECTS

**CLICKNDIG** | UI/UX DESIGNER / WEB DEVELOPER | <https://clickndig-potato.herokuapp.com> JAN '17 – MAR '17

*High Fidelity E-Commerce site for a popular item-finding product*

- Communicated with product owner to re-design and re-brand product to appeal to target audience
- Facilitated design-centered discussion, ideation, and whiteboarding to satisfy stakeholders' needs
- Assembled high-fidelity prototype within a week using HTML, CSS, and JavaScript

**GRAPE** | UI/UX DESIGNER / WEB DEVELOPER | [grapeapp.herokuapp.com](https://grapeapp.herokuapp.com) JAN '16 – MAR '16

*Mobile web application that encourages users to perform and keep track of good deeds*

- Conducted in-person field work for user testing of around 100 subjects with a team of three
- Implemented hierarchical html architecture with the use of Handlebars and JQuery
- Employed A/B testing to determine whether buttons or lists would result in more page clicks

**MULTI-ASIAN STUDENT ASSOCIATION** | WEB DEVELOPER | [masa.ucsd.edu](https://masa.ucsd.edu) FEB '16 – APR '16

*Official website for the largest social-cultural organization at UCSD*

- Designed a responsive, user-friendly web interface using HTML, CSS and Bootstrap
- Advertised website largely through Facebook and word-of-mouth for an audience of over 2,000.
- Wrote extensive documentation and comments within code for successors to maintain
